FIELD EXPERIENCE

Prairie Restoration Student

August 2024 - December 2024

University of Iowa, Iowa City, IA

Planned and developed an upcoming prairie garden with native Iowan plants to restore the area and increase biodiversity by working alongside the City of West Burlington and other organizations, maintained Iowa City Ashton Prairie by removing invasive species, familiarized myself with local plants and animals, and attained skills with power tools.

SOFTWARE AND TECHNOLOGY EXPERIENCE

Geographical Information Systems (GIS) Student

January 2025 - May 2025

University of Iowa, Iowa City, IA

Acquired knowledge on the principles and applications of GIS systems including the various projection and coordinate systems, how they operate, and when to apply them. Used spatial analysis skills to operate ArcGIS software to process geospatial data and create maps to calculate queries, find spatial patterns, and recognize additional variables to better process datasets.

Computer Lab Assistant

Des Moines Area Community College, Ankeny, IA

August 2022 - July 2023

Ran and operated the computer lab alongside the main computer lab coordinator, used Microsoft applications including Docs and Powerpoint, applied general computer operating skills to fix any device issues, aided with student inquiries about the application of the DMACC website

ENVIRONMENTAL ADVOCATION

Environmental Society and Sustained Policy Politics Student

August 2023 - December 2023

University of Iowa, Iowa City, IA

Gained knowledge on past and current environmental policies, debated with fellow students about upcoming written policy, simulated past debates with various perspectives within currently enforced climate laws, and advocated for environmental protection of native owned land
